Agile Team Charter

1. Team Purpose & Vision

Why do we exist as a team?

Team Mission

Our team aims to develop a digital solution that improves English literacy skills (reading, writing, and comprehension) for young learners in South Africa, especially from Grade 1 to Grade 3.

Many primary school learners struggle with basic English skills, which affects their ability to understand all subjects from Grade 4 onwards. Our solution is designed for young learners, parents, and teachers who need support in improving English literacy.

Success Definition:

We will consider the project successful if:

The website is functional and user-friendly

Learners can interact with reading and writing activities

Teachers/parents can track learner progress

The system is completed and demonstrated successfully

Product / Service:

An English Literacy Learning Website that includes:

Reading exercises

Writing practice

Simple quizzes

Progress tracking

---

2. Team Members & Roles

Who is on the team and how do we contribute?

Name	Role	Key Responsibilities
Sabotseng Ndaba	Product Owner	Defines the business idea, sets project goals, prioritises tasks, ensures the project meets project requirements.
Siphesihle Mposelwa	Agile Lead / Kanban Coordinator	Manages the Kanban board, monitors workflow, tracks task progress, removes blockers, ensures deadlines are met, and supports team collaboration.
Ricardo Mukwevho	Business Analyst	Conducts research, gathers requirements, completes feasibility analysis, helps develop the marketing strategy.
Lindokuhle Nanto	UI/UX Designer	Designs wireframes, creates system layouts, improves user experience, plans the look and feel of the platform.
Mhlana Sisonke	Developer/Tester	Plan system features, supports technical solutions, tests the system design, checks quality and functionality

3. Ways of Working

3.1 Agile Framework

Kanban – using Trello tool

We will use a Kanban board to manage our tasks and workflow. Tasks will move through columns such as:

- To Do
- In Progress
- Testing
- Done

This helps the team track progress, identify delays, and stay organised throughout the project.

Ceremony	Frequency	Purpose
Daily Stand-up	Daily (5–10 mins)	To share progress, current tasks, and challenges
Planning	Weekly or when needed	To decide and prioritise tasks on the Kanban

		board
Review / Demo	End of each week or milestone	To present completed features (reading exercises)
Retrospective	Weekly or after milestones	To reflect on team performance and improvements

4. Working Agreements

Rules we agree to follow as a team

- We show up prepared and attend all meetings on time
- We respect time limits and deadlines
- We communicate regularly using our group platform (e.g. WhatsApp)
- We update the Kanban board regularly
- We move tasks as progress is made (To Do → In Progress → Done)
- We give constructive and respectful feedback
- We raise blockers early, so the team can assist
- We take responsibility for our assigned tasks
- We support each other and work collaboratively
- We commit to continuous improvement

5. Communication

How and when we communicate
Primary channels:

Our team will mainly use Microsoft Teams and WhatsApp group for daily communication and quick updates. Trello will be used to track tasks and progress. Email will be used for more formal communication or when sharing important documents.

Response-time expectations:

Team members are expected to respond to messages within 2–4 hours during working hours. For urgent matters, responses should be as soon as possible. Non-

urgent messages can be addressed within the course of a day.

Remote / hybrid norms:

Team members should be available during agreed working hours and notify the team if they are unavailable. During online meetings, cameras should be on where possible to encourage engagement. Everyone should participate actively and communicate clearly.

---

6. Decision-Making

How decisions are made

☑ Consensus
☑ Product Owner final decision
☑ Team vote
☑ Agile Lead decides after input

Escalation path if we're stuck:

If the team cannot reach an agreement, the issue will first be discussed during a Kanban team check-in meeting. If no solution is found, the Agile Lead will review the blocked task, gather input from all members, and recommend the best solution to keep workflow moving. If the issue affects the business vision, priorities, or final requirements, the Product Owner will make the final decision. If further guidance is needed, the matter will be escalated to the lecturer or supervisor.

---

7. Definition of Done (DoD)

Work will be considered "done" when:

- The feature or component has been fully designed and implemented
- The user interface (UI) is complete and consistent with the design (Figma)
- The functionality works correctly without errors
- Testing has been completed and any major issues have been fixed
- Tasks are updated and marked as "Done" on Trello
- All required documentation has been completed
- The work meets the project requirements and user needs

- The Product Owner has reviewed and approved the work
- The feature is ready to be demonstrated or submitted

---

8. Core Values & Behaviours

- **Respect:** We respect each team member's ideas, opinions, and contributions
- **Transparency:** We communicate openly about progress, challenges, and delays
- **Accountability:** Each member takes responsibility for their assigned tasks
- **Collaboration:** We work together and support each other to achieve team goals
- **Commitment:** We stay dedicated to completing tasks on time and to a high standard
- **Continuous Improvement:** We learn from feedback and improve after each iteration

9. Risks & Constraints

Known Risks:

- Poor time management by team members
- Miscommunication or lack of participation
- Technical difficulties during development
- Limited experience with tools (Figma, coding)

Dependencies:

- Internet access
- Availability of team members
- Feedback from lecturer

Constraints:

- Limited time due to academic deadlines
- Skill level (still learning development concepts)
- Limited access to advanced tools/resources

---

10. Review & Improvement

Keeping the charter alive

- Charter reviewed every:
  ☐ Retrospective
- Last updated: 04 May 2026

---

11. Team Commitment

Our agreement to this charter

By working on this team, we commit to the principles and agreements outlined above.
